Professional Summary

React Native & Full Stack Engineer with 3 years building enterprise mobile apps and FastAPI backend services. Delivered a 99.9% crash-free agri-fintech app to 10,000+ users and architected 20+ microservices for an AI-driven procurement platform at Mindsprint (Olam Group). Specialized in cross-platform mobile development, offline-first architecture, and AI frontend integration — connecting end users to LLM-powered workflows via conversational UI and streaming API consumption.

Technical Skills

Mobile Dev	React Native, React Navigation, Redux Toolkit, Offline Data Sync, Role-Based UI, Google Maps SDK
Backend Dev	FastAPI, Python, Microservices Architecture, API Orchestration, RESTful APIs, Async Programming
AI Integration	Conversational Chat, Streaming Responses (LLM APIs), LLM API Integration
Cloud & Tools	Firebase (Auth, Firestore, FCM), CleverTap Analytics, Git, Agile/Scrum, JIRA

Professional Experience

2023–Present **Software Engineer, Mindsprint (Olam Group), Bengaluru, India**
Lead key engineering streams across high-impact consumer mobile applications and advanced enterprise B2B procurement systems.

Product: Mahadhan App & Mobile Portfolio (Mobile Developer)

- Engineered cross-platform architectures using React Native and Redux Toolkit to deliver a robust agri-fintech mobile suite, centered around the flagship Mahadhan App (10k+ active users).
- Designed and implemented complex offline-first synchronization logic and dynamic, role-based user interfaces to maintain complete operability in low-connectivity areas.
- Achieved an outstanding 99.9% crash-free session rate across iOS and Android production channels, releasing over 50+ seamless feature updates with zero critical regressions.
- Integrated Google Maps SDK for precise geographical logistics tracking and CleverTap analytics to implement behavioral user-funnel tracking and targeted push notifications.

Product: Enterprise AI-Driven Procurement Platform (Full Stack & AI Integration)

- Architected and deployed 20+ FastAPI asynchronous microservices executing high-throughput data orchestration between the mobile UI layers and AI processing pipelines with 100% uptime.
- Developed custom, secure onboarding modules automating both manual and agentic vendor verification pipelines with real-time risk-factor evaluation, reducing manual query handling by ~25% via automated workflows.
- Designed prompt-driven mobile UI flows and conversational chat components to consume streaming LLM APIs, connecting end users with automated, background agentic workflows.

Education

- 2024–2026 **Master of Business Administration (MBA) – Analytics & Data Science, Manipal University, Jaipur (Online)**
- 2019–2023 **Bachelor of Technology (B.Tech) in Computer Science, Rajasthan Institute of Engineering and Technology, Jaipur, India, CGPA: 8.5**

Awards & Recognition

- 2025 **Excellence Achiever (Individual Award)** | Received for outstanding code quality, proactive backend optimizations, and delivering high-value procurement features at Mindsprint.
- 2025 **Customer Centricity (Team Award)** | Awarded for agile responses to client feedback and maintaining high system stability across the Mahadhan application.
